

## Emergency fire extinguishing AS1

---

## Emergency fire extinguishing AS1

---

The aim of emergency fire response training is that those who participate in the training are able to safely use a fire safety blanket and a hand-held extinguisher, as a minimum. At the end of the training, the trainer will show a grease fire demo, which will surely remind every participant why a grease fire should not be extinguished with water. The certificate is given after the training. If necessary, participants will receive an official AS1 card of the Finnish Rescue Service Association (SPEK), which is valid for five years. Card fee €10 + VAT / person. Group size max 15 people. The price of the training is 490 € + VAT / group. The training is produced by Pivaset's liaison partner [Safetycon Oy](#).

### Emergency Fire Extinguishing AS1 (2h)

The aim of emergency fire response training is that those who participate in the training are able to safely use a fire safety blanket and a hand-held extinguisher, as a minimum.

An additional conceptual aim is that trainees will know how to recognise risk in their surrounding environment and understand the impact of emergency fire response skills in the event of a fire.

- Fire characteristics and development
- The importance of initial extinguishing
- Operation in case of fire
- Use of a hand fire extinguisher, fire hydrant and extinguishing blanket
- Practical exercises outdoors: extinguishing a fire, a burning container and a person with suitable equipment

At the end of the training, the trainer will show a grease fire demo, which will surely remind every participant why a grease fire should not be extinguished with water. The certificate is given after the training. If necessary, participants will receive an official AS1 card of the Finnish Rescue Service Association (SPEK), which is valid for five years. Card fee €10 + VAT / person. Group size max 15 people.

The price of the training is 490 € + VAT / group. The price does not include other expenses (possible space rentals, catering).

The training is produced by Pivaset's liaison partner Safetycon Oy. Additional questions and inquiries about training [www.safetycon.fi](http://www.safetycon.fi)
